

PB 10/20 Crusher

The PB 10/20 Crusher is a medium size crushing machine designed for size reduction of most types of animal by-products. The crushed material can easily be transported in screw conveyors or pumps, which makes the cooking process more efficient.

General Information

- Capacity range up to 5 tons of raw material per hour, including whole small carcasses.

- Consistent discharge particle size complying with the EU Directives.
- Low operation costs are assured by adjusting motor size and breaker shaft speed to the capacity required.

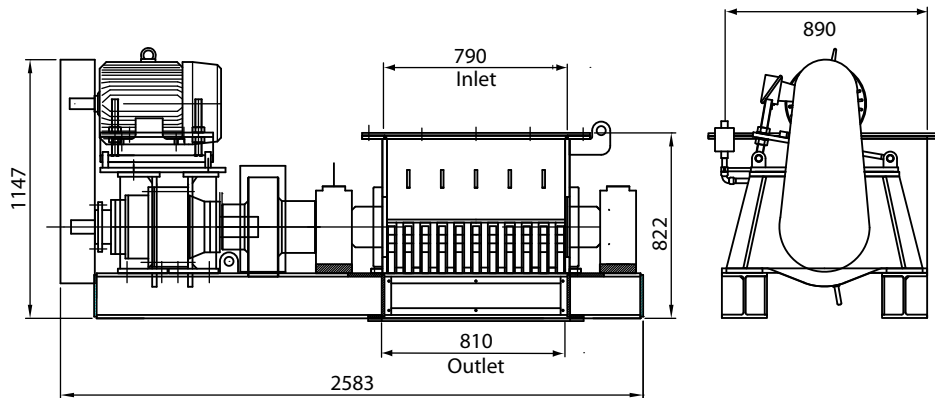

Haarslev Industries

Haarslev Industries is one of the world's leading companies within handling and processing of by-products from food-related industries.

Since 2003, Haarslev Industries has integrated the famous range of pre-breakers and crushers of Sværtek. The Sværtek brand is recognised world-wide for outstanding quality and reliability.

Technical Description

- Rotating knives and anvils are hard faced on all cutting edges.
- Shaft passage at end walls is provided with stuffing boxes as standard.
- Low-speed breaker shaft ensures that the pre-breaker can handle metals in the raw material being crushed.
- The design of the main bearing houses of the breaker shaft allows quick maintenance and replacement of breaker shaft.
- Removable counter flanges fitted to the inlet and outlet as standard.
- Inlet hopper and supports are made to measure upon request.

Technical Specifications	Unit	Type PB10/20
Capacity	t/h	1-5
Gap between anvils	mm	40
Power/motor	kW	18.5
Shipping weight	kg	3.200

We reserve the right to alter the specifications at any time without prior notice.
