

Silo

The Haarslev product programme for rendering comprises various types of silos.

The size and design of the silos will depend on the amount of material, on the process in the subsequent plant, and on the kind of material to be handled. We supply all kinds of silos, from small charging/dosing silos (71-177 ft³) to large storage silos of approximately 187-249 thousand ft³.

The manufacture can be of stainless steel, mild steel or a combination of both.

The transport sections are usually individual to each plant. Our engineers have years of experience in designing the silos according to the customer's needs as well as in ensuring that the plant can fulfil the high hygienic standards.

Haarslev Industries

Haarslev Industries is an innovative and dynamic company, one of the world's leading companies within handling and processing of by-products from food-related industries.

We reserve the right to alter the specifications at any time without prior notice.
