Statement by Management on the annual report

The Board of Directors and the Executive Board have today considered and approved the annual report of Haarslev Group Holding A/S for the financial year 01.01.2015 - 31.12.2015.

The annual report is presented in accordance with the Danish Financial Statements Act.

In our opinion, the consolidated financial statements and the parent financial statements give a true and fair view of the Group's and the Parent's financial position at 31.12.2015 and of the results of their operations and the Group's cash flows for the financial year 01.01.2015 – 31.12.2015.

We believe that the management commentary contains a fair review of the affairs and conditions referred to therein.

We recommend the annual report for adoption at the Annual General Meeting.

Independent auditor's reports

To the owners of Haarslev Group Holding A/S

Report on the consolidated financial statements and parent financial statements

We have audited the consolidated financial statements and parent financial statements of Haarslev Group Holding A/S for the financial year 01.01.2015 - 31.12.2015, which comprise the accounting policies, income statement, balance sheet, statement of changes in equity and notes for the Group as well as for the Parent and the consolidated cash flow statement for the Group. The consolidated financial statements and parent financial statements are prepared in accordance with the Danish Financial Statements Act.

Management's responsibility for the consolidated financial statements and parent financial statements

Management is responsible for the preparation of consolidated financial statements and parent financial statements that give a true and fair view in accordance with the Danish Financial Statements Act and for such internal control as Management determines is necessary to enable the preparation of consolidated financial statements and parent financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on the consolidated financial statements and parent financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing and additional requirements under Danish audit regulation. This requires that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether consolidated financial statements and parent financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements and parent financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatements of the consolidated financial statements and parent financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation of consolidated financial statements and parent financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by Management, as well as the overall presentation of the consolidated financial statements and parent financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Our audit has not resulted in any qualification.

Opinion

In our opinion, the consolidated financial statements and parent financial statements give a true and fair view of the Group's and the Parent's financial position at 31.12.2015, and of the results of their operations and the Group's cash flows for the financial year 01.01.2015 - 31.12.2015 in accordance with the Danish Financial Statements Act.

Independent auditor's reports

Statement on the management commentary

Pursuant to the Danish Financial Statements Act, we have read the management commentary. We have not performed any further procedures in addition to the audit of the consolidated financial statements and parent financial statement.

On this basis, it is our opinion that the information provided in the management commentary is consistent with the consolidated financial statements and parent financial statement.

Management commentary

Primary activities

Haarslev Industries is a global provider of process solutions and equipment for the drying, dehydrating and processing of fish-based and animal by-products and by-products from the brewing and distilling industries. The Group also offers its process solutions, drying and dehydrating equipment for the municipal and industrial environmental sectors.

Haarslev Group Holding A/S serves as holding company.

Development in activities and finances

The Company's income statement for 2015 shows a loss after tax of DKK (12.331)k, which is lower than expected and not in accordance with outlook presented in the annual report 2014. The development is an improvement compared to 2014 – driven by a significant higher revenue, but partially offset by a lower profitability. The Group's balance sheet at 31 December 2015 shows equity of DKK 727.290k.

Uncertainty relating to recognition and measurement

The majority of the Group's revenue originates from contract work in progress. Contract work in progress is measured at the selling price of work performed and recognised on the basis of the stage of completion of work performed. The stage of completion is based on estimates as well as expected future events and is thus subject to uncertainty.

Unusual circumstances affecting recognition and measurement

The Group's financial position at 31 December 2015 and its results from activities and cash flows for the financial year for 2015 have not been affected by any unusual circumstances.

Outlook

Compared to 2014 the market picked well up in 2015 with a good year-on-year growth. Into 2016 it is expected that the market will continue to be positive and increasing in key markets and segments. As such the Group also expects that 2016 will end at a higher level than 2015.

Particular risks

As a consequence of its operations, investments and financing, the Group is exposed to volatility in terms of raw material prices, exchange rates and the level of interest. The fiscal policy pursued by the Company involves operating with a low risk profile so that risks concerning exchange rates, interest rates and credit only arise should commercial conditions occur. On an ongoing basis, the Group enters into currency contracts for hedging of currency risks.

At 31 December 2015, Haarslev Group Holding A/S' external interest-bearing debt totals a net amount of DKK 595,442k. The Group's guidelines and procedures for control and management of the capital structure remained unchanged in 2015.

Management commentary

Intellectual capital resources

The Group's ambition is to be in the lead of technological development. The Group has considerable intellectual capital resources within its field of activity, which may be divided into four categories: Customers, Technology, Processes and Staff relations.

Customers

The Group aims at creating value for its customers by providing intelligent solutions created in cooperation with the individual customer, meeting the customers' expectations through the delivery of customised, high-quality products, delivered in accordance with terms of delivery, etc. The key performance indicators in this respect include customer satisfaction and customer loyalty. Follow-up is made regularly through close dialogue with the customers.

Technology

It is important for the Group – in both the short and long term – to ensure the right portfolio of production technologies and a continued further development of existing production technologies.

Processes

The critical business processes relate to the development of individual solutions, quality and service. In order to make sure that the customer receives the agreed service, the individual methods and procedures shall be documented. Compliance with time of delivery and the scope of warranty expenses are important indicators of the functionality of business processes. The Group constantly makes great efforts to ensure that the goals set up for the business processes are complied with. Furthermore, the Group's internal development activities are constantly focused on improving products and processes, often in cooperation with the customer.

Staff relations

In order to constantly be able to deliver and develop competitive products and solutions, it is crucial that the Group is capable of recruiting and retaining highly qualified employees.

The number of employees has developed as follows:

	<u>Denmark</u>	<u>Globally</u>
Number of employees, beginning of year	313	1,061
Change	<u>80</u>	<u>148</u>
Number of employees, end of year	<u>393</u>	<u>1,209</u>

Management commentary

Environmental performance

The Group cares about the environment and is currently working on reducing the environmental impact from the Group's operation and the processes and products offered. The Group possesses the relevant environmental approvals, and the Group's activities do not involve harmful or extraordinary impacts to the environment

Research and development activities

The Group is not engaged in research, but is developing its business and competencies on an ongoing basis.

Corporate governance

The Board of Directors and Executive Board of Haarslev Group Holding constantly seek to ensure that the management structure and control systems of the Group are appropriate and satisfactory. On an ongoing basis, Management assesses whether this remains the case. The tasks and responsibilities of Management are, among others, based on the Danish Companies Act, the Danish Financial Statements Act, the Company's Articles of Association and generally accepted practice for enterprises of the same size and with the same international reach as Haarslev Group Holding. In this connection and because the Group's principal shareholder is Altor Fund III, who is a member of Danish Venture Capital and Private Equity Association (www.dvca.dk), then the Haarslev Group in all material respects complies with the guidelines for responsible ownership and corporate governance of DVCA.

On this basis, Management has developed a number of internal procedures to ensure an active, secure and profitable management of the Group. This includes a strengthening of the Group Finance function as well as an increased number of financial control reviews and controlling visits to be implemented early 2016, where also an updated "Code of Conduct" across the Group will be implemented.

Operational risk management

The main operational risks in the Group relates to the execution of large complex customer projects. The Group's extensive know-how and many years of experience within project management are the main components in mitigating this risk. Bid reviews and project support from central knowledge centres are an integrated part of the project management process.

Additionally, a number of reporting procedures are set up in order to monitor project progress and to secure actions are taken if unforeseen issues arise during the project lifetime. The status on the largest projects are reported to the Board of Directors on a monthly basis.

In relation to the preparation of the annual financial statements, Management has particular focus on the control procedures in relation to the following items:

- Revenue recognition of large projects
- Valuation of work in progress

Management commentary

The formal monthly reporting procedures as well as review meetings are set up to mitigate risks related to these items.

Shareholder relations

On an ongoing basis, the Board of Directors assesses whether the Company's capital structure is in accordance with the Company's and its stakeholders' interests. The overall objective is to ensure a capital structure that supports long-term, profitable growth.

At 31 December 2015, Haarslev Group Holding's external interest-bearing debt totals a net amount of DKK 595,442k which Group Management consider a reasonable and acceptable level. The Group's guidelines and procedures for control and management of the capital structure remained unchanged in 2015.

The Company's Articles of Association stipulate no limits of ownership or voting rights. If an offer is received for an acquisition of company shares, the Board of Directors will consider this in accordance with the law. The Haarslev Group's principal shareholder is Altor Fund III who possesses ~72% of the Group's shares. The Group's CEO controls a minority share of ~27%, and the remaining share capital is owned by members of Group Management. Thus, Altor Fund III has a controlling interest in the Group.

Management commentary

Board of Directors

Søren Johansen ¹

Chairman of the Board of Directors. Member of the Board since 2012.

Yasmin Celkan ³

Member of the Board of Directors since 2014.

Project Manager at Haarslev Industries A/S.

Responsibilities of the Board of Directors

The Board of Directors as a whole has monitored the preparation of the financial reporting, the internal controls and the audit of the financial statements. The Board of Directors has chosen not to set up a separate audit committee.

The Board of Directors ensures that the Executive Board comply with the objectives, strategies and procedures laid down by the Board of Directors. The reporting from the Executive Boards of the respective companies takes place systematically, both at meetings and through written and oral reporting on an ongoing basis.

Management commentary

Among other things, this reporting includes a description of the development in key markets, as well as the Group's operational and financial development. The Board of Directors holds meetings according to a fixed plan with at least five meetings a year and extraordinary meetings are convened if required.

Management remuneration

In order to attract and retain the Group's management competencies, remuneration of the members of the Executive Board and executives is determined considering their responsibilities, value creation and the conditions of comparable enterprises. The remuneration includes performance-related elements aimed at aligning interests between company management and the shareholders as the schemes consider both short-term and long-term goals.

Such performance-related elements include cash bonuses as well as a warrant programme for selected key executives responsible for the day-to-day management.

Dividend policy

Payment of dividend takes place in due consideration of the necessary consolidation of equity as a basis for the Group's continued expansion. No dividend is proposed for 2015.

Stakeholders

The Group constantly seeks to develop and maintain good relations with its stakeholders as such relations are assessed to be of significant and positive importance to the Group's development. On this basis, Haarslev Group Holding is pursuing an active communication with its stakeholders and, moreover, has separate policies for various key areas such as staff, environmental factors and responsibility towards customers and society at large. These policies are to ensure that information of importance to, among others, investors, employees and authorities is provided and published in accordance with rules and agreements.

Part of the work of the Board of Directors is to ensure both compliance with and regular adaptation of the guidelines in accordance with the development in and around the Group.

Corporate social responsibility

Haarslev Group Holding A/S has decided to publish the statutory CSR and Diversity statements on the Company's website, see the Danish Financial Statements Act, § 99a and § 99b. The CSR and Diversity statements are developed for the legal entity Haarslev Industries A/S only, and do therefore not include any subsidiaries. To read the statements please visit <http://haarslev.com/CSR-performance.1208.aspx>.

Management commentary

Events after the balance sheet date

No events have occurred after the balance sheet date to this date which would influence the evaluation of the annual report

Accounting policies

Reporting class

This annual report has been presented in accordance with the provisions of the Danish Financial Statements Act governing reporting class C enterprises (large).

The accounting policies applied for these consolidated financial statements and parent financial statements are consistent with those applied last year.

Recognition and measurement

Assets are recognised in the balance sheet when it is probable as a result of a prior event that future economic benefits will flow to the Entity, and the value of the asset can be measured reliably.

Liabilities are recognised in the balance sheet when the Entity has a legal or constructive obligation as a result of a prior event, and it is probable that future economic benefits will flow out of the Entity, and the value of the liability can be measured reliably.

On initial recognition, assets and liabilities are measured at cost. Measurement subsequent to initial recognition is effected as described below for each financial statement item.

Anticipated risks and losses that arise before the time of presentation of the annual report and that confirm or invalidate affairs and conditions existing at the balance sheet date are considered at recognition and measurement.

Income is recognised in the income statement when earned, whereas costs are recognised by the amounts attributable to this financial year.

Consolidated financial statements

The consolidated financial statements comprise the Parent and the group enterprises (subsidiaries) that are controlled by the Parent. Control is achieved by the Parent, either directly or indirectly, holding more than 50% of the voting rights or in any other way possibly or actually exercising controlling influence. Enterprises in which the Group, directly or indirectly, holds between 20% and 50% of the voting rights and exercises significant, but not controlling influence are regarded as associates.

Accounting policies

Basis of consolidation

The consolidated financial statements are prepared on the basis of the financial statements of Parent and its subsidiaries. The consolidated financial statements are prepared by combining uniform items. On consolidation, intra-group income and expenses, intra-group accounts and dividends as well as profits and losses on transactions between the consolidated enterprises are eliminated. The financial statements used for consolidation have been prepared applying the Group's accounting policies.

Subsidiaries' financial statement items are recognised in full in the consolidated financial statements. Investments in subsidiaries are offset at the pro rata share of such subsidiaries' net assets at the takeover date, with net assets having been calculated at fair value.

Business combinations

Newly acquired or newly established enterprises are recognised in the consolidated financial statements from the time of acquiring or establishing such enterprises. Divested or wound-up enterprises are recognised in the consolidated income statement up to the time of their divestment or winding-up.

The purchase method is applied at the acquisition of new enterprises, under which identifiable assets and liabilities of these enterprises are measured at fair value at the acquisition date. On acquisition of enterprises, provisions are made for costs relating to decided and published restructurings in the acquired enterprise. Allowance is made for the tax effect of restatements.

Positive differences in amount (goodwill) between cost of the acquired share and fair value of the assets and liabilities taken over are recognised under intangible assets, and they are amortised systematically over the income statement based on an individual assessment of their useful life, however, no more than 20 years. Negative differences in amount (negative goodwill), corresponding to an estimated adverse development in the relevant enterprises, are recognised in the balance sheet under deferred income, and they are recognised in the income statement when such adverse development is realised.

Profits or losses from divestment of equity investments

Profits or losses from divestment or winding-up of subsidiaries are calculated as the difference between selling price or settlement price and the carrying amount of the net assets at the time of divestment or winding-up, inclusive of non-amortised goodwill and estimated divestment or winding-up expenses.

Accounting policies

Foreign currency translation

On initial recognition, foreign currency transactions are translated applying the exchange rate at the transaction date. Receivables, payables and other monetary items denominated in foreign currencies that have not been settled at the balance sheet date are translated using the exchange rate at the balance sheet date. Exchange differences that arise between the rate at the transaction date and the one in effect at the payment date, or the rate at the balance sheet date are recognised in the income statement as financial income or financial expenses. Property, plant and equipment, intangible assets, inventories and other non-monetary assets that have been purchased in foreign currencies are translated using historical rates.

Income statement

Revenue

Revenue from the sale of manufactured goods and goods for resale is recognised in the income statement when delivery is made and risk has passed to the buyer. Revenue is recognised net of VAT, duties and sales discounts.

Contract work in progress is included in revenue based on the stage of completion so that revenue corresponds to the selling price of the work performed in the financial year (the percentage-of-completion method).

Production costs

Production costs comprise expenses incurred to earn revenue for the financial year. Production costs comprise direct and indirect costs for raw materials and consumables, wages and salaries, maintenance and depreciation, etc, as well as operation, administration and management of factories.

Production costs also include research and development costs that do not qualify for capitalisation as well as amortisation of capitalised development costs. Furthermore, amortisation of goodwill is included to the extent that goodwill relates to production activities. Finally, provisions for losses on contract work are recognised.

Distribution costs

Distribution expenses comprise costs in the form of salaries to sales and distribution staff, advertising and marketing expenses as well as operation of motor vehicles, depreciation, etc.

Administrative expenses

Administrative expenses comprise expenses for Management, administrative staff, office expenses, depreciation, etc.

Accounting policies

Other financial income

Other financial income comprises interest income, realised and unrealised exchange adjustments as well as extra payments and tax relief under the Danish Tax Prepayment Scheme etc.

Other financial expenses

Other financial expenses comprise interest expenses, realised and unrealised exchange adjustments as well as amortisation of financial liabilities as well as tax surcharge under the Danish Tax Prepayment Scheme etc.

Income taxes

Tax for the year, which consists of current tax for the year and changes in deferred tax, is recognised in the income statement by the portion attributable to the profit for the year and recognised directly in equity by the portion attributable to entries directly in equity.

The Entity is jointly taxed with all of its other Danish subsidiaries. The current income tax is allocated among the jointly taxed companies proportionally to their taxable income (full allocation with a refund concerning tax losses).

Balance sheet

Goodwill

Goodwill is measured at cost less accumulated amortisation and impairment. Goodwill is recognised only for corporate takeovers effective on or after 1 January 2002.

Goodwill is amortised over the expected economic life, measured by reference to an assessment of, among other factors, the nature and market position of the business, the stability of the industry and the dependence on key staff. The amortisation period is 20 years.

Goodwill is written down to the lower of recoverable amount and carrying amount.

Intellectual property rights etc

Intellectual property rights etc comprise development projects completed and in progress with related intellectual property rights, acquired intellectual property rights and prepayments for intangible assets.

Development projects that are clearly defined and identifiable and in respect of which the technological feasibility, sufficient resources and a potential future market or development potential in the enterprise can be demonstrated, and where the intention is to produce, market or use the product or the process, are recognised as intangible assets provided that it is sufficiently certain that the future earnings are adequate to cover the production, sales and administrative expenses and the aggregate development costs. Other development costs are expensed in the income statement as incurred.

Accounting policies

Development costs are measured at direct costs and a portion of the costs that can be related indirectly to the individual development projects. Development costs recognised as intangible assets have an amortisation period of 3 - 10 years.

Intellectual property rights etc are written down to the lower of recoverable amount and carrying amount.

Property, plant and equipment

Buildings, plant and machinery as well as other fixtures and fittings, tools and equipment are measured at cost less accumulated depreciation and impairment losses.

Cost comprises the acquisition price, costs directly attributable to the acquisition and preparation costs of the asset until the time when it is ready to be put into operation. For self-manufactured assets, cost comprises direct and indirect costs of materials, components, sub-suppliers and labour costs.

The basis of depreciation is cost less estimated residual value after the end of useful life. Straight-line depreciation is made on the basis of the following estimated useful lives of the assets:

Buildings	25 years
Plant and machinery	3-10 years
Other fixtures and fittings, tools and equipment	3-10 years

Property, plant and equipment are written down to the lower of recoverable amount and carrying amount.

Investments in group enterprises

Investments in group enterprises are recognised and measured according to the equity method. This means that investments are measured at the pro rata share of the enterprises' equity plus or minus unamortised positive or negative, goodwill and plus or minus unrealised intra-group profits or losses.

Group enterprises with negative equity are measured at DKK 0, and any receivables from these enterprises are written down by the Parent's share of such negative equity if it is deemed irrecoverable. If the negative equity value exceeds the amount receivable, the remaining amount is recognised under provisions if the Parent has a legal or constructive obligation to cover the liabilities of the relevant enterprise.

Net revaluation of investments in subsidiaries is transferred to "Reserve for net revaluation according to the equity method" under equity.

Accounting policies

Goodwill is calculated as the difference between cost of the investments and fair value of the assets and liabilities acquired. Goodwill is amortised over its estimated useful life and in certain cases it may be up to 20 years for strategically acquired enterprises with a strong market position and a long-term earnings profile.

Investments in subsidiaries are written down to the lower of recoverable amount and carrying amount.

Receivables

Receivables are measured at amortised cost, usually equalling nominal value less write-downs for bad and doubtful debts.

Inventories

Inventories are measured at the lower of cost using the FIFO method or net realisable value if this is lower.

Cost of goods for resale, raw materials and consumables consists of purchase price plus delivery costs. Cost of manufactured goods and work in progress consists of costs of raw materials, consumables, direct labour costs and indirect production costs.

The net realisable value of inventories is calculated as the estimated selling price less completion costs and costs incurred to execute sale.

Contract work in progress

Contract work in progress is measured at the selling price of the work carried out at the balance sheet date.

The selling price is measured based on the stage of completion and the total estimated income from the individual contracts in progress. The stage of completion is determined as the ratio of actual to total budgeted consumption of resources. Where it is probable that total contract expenses will exceed total revenues from a contract, the expected loss is recognised as an expense in the income statement.

Each contract in progress is recognised in the balance sheet under receivables or liabilities other than provisions, depending on whether the net value, calculated as the selling price less prepayments received, is positive or negative.

Costs of sales work and of securing contracts as well as financing costs are recognised in the income statement as incurred.

The selling price is measured based on the stage of completion and the total estimated income from the individual contracts in progress. Usually, the stage of completion is determined as the ratio of actual to total budgeted consumption of resources.

Accounting policies

Cash

Cash comprises cash in hand and bank deposits.

Deferred tax

Deferred tax is recognised on all temporary differences between the carrying amount and tax-based value of assets and liabilities, for which the tax-based value of assets is calculated based on the planned use of each asset.

Deferred tax assets, including the tax base of tax loss carryforwards, are recognised in the balance sheet at their estimated realisable value, either as a set-off against deferred tax liabilities or as net tax assets.

Deferred tax relating to re-taxation of previously deducted losses of foreign subsidiaries is recognised based on a specific assessment of the purpose of the individual subsidiary.

Other provisions

Other provisions comprise anticipated costs of non-recourse guarantee commitments, loss on contract work in progress.

Other provisions are recognised and measured as the best estimate of the expenses required to settle the liabilities at the balance sheet date. Provisions that are estimated to mature more than one year after the balance sheet date are measured at their discounted value. Other provisions are measured at net realisable value.

Once it is likely that total costs will exceed total income from a contract in progress, provision is made for the total loss estimated to result from the relevant contract.

Finance lease commitments

Lease commitments relating to assets held under finance leases are recognised in the balance sheet as liabilities other than provisions, and, at the time of inception of the lease, measured at the present value of future lease payments. Subsequent to initial recognition, lease commitments are measured at amortised cost. The difference between present value and nominal amount of the lease payments is recognised in the income statement as a financial expense over the term of the leases.

Lease payments on operating leases are recognised on a straight-line basis in the income statement over the term of the lease.

Accounting policies

Other financial liabilities

Other financial liabilities are measured at amortised cost, which usually corresponds to nominal value.

Prepayments received from customers

Prepayments received from customers comprise amounts received from customers prior to delivery of the goods agreed or completion of the service agreed.

Income tax receivable or payable

Current tax payable or receivable is recognised in the balance sheet, stated as tax calculated on this year's taxable income, adjusted for prepaid tax.

Cash flow statement

The cash flow statement shows cash flows from operating, investing and financing activities as well as cash and cash equivalents at the beginning and the end of the financial year.

Cash flows from operating activities are presented using the indirect method and calculated as the operating profit/loss adjusted for non-cash operating items, working capital changes and income taxes paid.

Cash flows from investing activities comprise payments in connection with acquisition and divestment of enterprises, activities and fixed asset investments as well as purchase, development, improvement and sale, etc of intangible assets and property, plant and equipment, including acquisition of assets held under finance leases.

Cash flows from financing activities comprise changes in the size or composition of the Company's share capital and related costs as well as the raising of loans, instalments on interest-bearing debt, purchase of treasury shares, and payment of dividend.

Cash and cash equivalents comprise cash and short-term securities with an insignificant price risk less short-term bank debt.

Cash flow statement cannot directly be derived from the income statement and the balance sheet.

Accounting policies

Financial highlights

Financial highlights are defined and calculated in accordance with "Recommendations & Ratios 2015" issued by the Danish Society of Financial Analysts.

Ratios	Calculation formula	Ratios reflect
Gross margin (%)	$\frac{\text{Gross profit} \times 100}{\text{Revenue}}$	The Entity's operating gearing.
Net margin (%)	$\frac{\text{Profit/loss for the year} \times 100}{\text{Revenue}}$	The Entity's operating profitability.
Return on equity (%)	$\frac{\text{Profit/loss for the year} \times 100}{\text{Average equity}}$	The Entity's return on capital invested in the Entity by the owners.
Equity ratio (%)	$\frac{\text{Equity} \times 100}{\text{Total assets}}$	The financial strength of the Entity.

	<u>365,987</u>	<u>316,018</u>

Special incentive programmes

At the Company's Annual General Meeting on 30 March 2012, a decision was made to grant share options. The Board of Directors is authorised to grant share options through one or more allocations. These options give the right to subscribe for A shares up to nominal DKK 450 thousand in the Company. The authorisation is valid until 30 March 2017. The capital increase is performed through cash payment in connection with the exercising of share options.

	Board of Directors Quantity	Executive Board and other employees in Management Quantity	Total Quantity
